-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 November 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 26-38 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 26-38 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
- a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 26-30, 32, and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Des. 322,048 to Saarinen.

Regarding Claims 26 and 35, Saarinen teaches a bulb tray with a plastic body having a number of accommodations for receiving one bulb in each accommodation, each of the accommodations being delimited by peripheral boundary walls and having a plurality of radially inwardly extending positioning members for clamping the bulb, each positioning member having a free edge, wherein each accommodation is provided at the top with an insertion opening for the bulb (Fig. 1) and is at least partially open at the bottom; the opening at the bottom being delimited by a cutting edge acting in the direction in which the bulb is removed from the accommodation (Fig. 4).

Regarding Claim 27, Saarinen teaches the positioning members are plates extending increasingly further into the accommodation from the insertion opening to the bottom of the accommodation (Fig. 3 and Fig. 4).

Regarding Claim 28, Saarinen teaches the plates are substantially perpendicular to the peripheral boundary of the accommodation (Fig. 3 and Fig. 4).

Regarding Claim 29, Saarinen inherently teaches that the positioning members have sharp cutting edges (Fig. 4).

Regarding Claim 30, Saarinen teaches that each accommodation has at least three positioning members (Fig. 4).

Regarding Claim 32, Saarinen discloses that the positioning members have strips of material fixed at the top of the accommodations for resiliently clamping the plants (Fig. 3).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 31, 33, 34, and 36-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent Des. 322,048 to Saarinen.

Regarding Claim 31, Saarinen does not explicitly teach that the boundary walls are of a thickness less than 2.5 mm. However, it would have been obvious to one of ordinary skill in the art to modify the teachings since the modification is merely an engineering design choice to achieve certain manufacturing cost parameters.

Regarding Claim 33, Saarinen discloses that the accommodations has eight sides and arranged in a honeycomb pattern (Fig. 1), but is silent on a six sided desing. However, it would have been obvious to one of ordinary skill in the art to modify the

Art Unit: 3643

teachings since the modification is merely an aesthetic design choice or a change in size to accommodate different size bulbs.

Regarding Claim 34, Saarinen as modified is silent that the positioning members extend from a corner point of the accommodation. However, it would have been obvious to one of ordinary skill in the art since the modification is merely the an engineering design choice of shifting the location of parts that perform the same intended function.

Regarding Claim 36 and 37, Saarinen teaches the bulb tray cultivation system (Fig. 1-4), but is silent on the container that receives the bulb tray and free space. However, It would have been obvious to one of ordinary skill in the art to modify the teachings since it is and old and notoriously well-known to provide a tray under a plant support for transporting purposes and for use in hydroponic systems for collecting/distributing liquids and nutrients.

Regarding Claim 38, Saarinen as modified does not explicitly teach that the boundary walls are of a thickness less than 2.5 mm. However, it would have been obvious to one of ordinary skill in the art to modify the teachings since the modification is merely an engineering design choice to achieve certain manufacturing cost parameters.

Response to Arguments

Applicant's arguments with respect to claims 26-38 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 2,814,910; U.S. Patent No. 5,481,825; and U.S. Patent No. 2,930,162.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

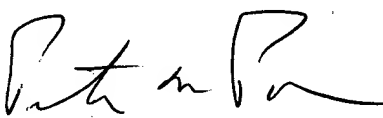

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrea M. Valenti whose telephone number is 703-305-3010. The examiner can normally be reached on 7:30am-5pm M-F; Alternating Fridays Off.

Art Unit: 3643

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter M. Poon can be reached on 703-308-2574. The fax phone numbers for the organization where this application or proceeding is assigned are 703-306-4195 for regular communications and 703-305-0285 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-4357.
